## American Experience Experts

You and your group are historians who specialize in American history. In particular, you are very familiar with the American experiences during WWII and President Truman's decision to drop the atomic bomb.

### Directions:

- To prepare for a discussion with a group of Japanese experience historians, go through the Atomic Bomb Documents packet.
- As you re-read with your group, highlight or underline quotes, facts, images, information, etc. that supports the "Hiroshima as Triumph" narrative. In other words, look for information that proves that America was **right** to drop the atomic bomb.
- Record your main points in the space below.
