

Japanese Experience Experts

You and your group are historians who specialize in Japanese history. In particular, you are very familiar with the Japanese experiences of Hiroshima and Nagasaki.

Directions:

- To prepare for a discussion with a group of American experience historians, go through the Atomic Bomb Documents packet.
- As you re-read with your group, highlight or underline quotes, facts, images, information, etc. that supports the "Hiroshima as Victimization" narrative. In other words, look for information that proves that America was **wrong** to drop the atomic bomb.
- Record your main points in the space below.

Japanese Experience – Main Points...
